

PPO-Elektroniikka's fire safety work recognized in Russia

St. Petersburg City Government has recognized PPO-Elektroniikka's long-term fire safety work in the St. Petersburg area. PPO-Elektroniikka has been collaborating with the city of St. Petersburg, the local fire safety organizations and public authorities since the beginning of the 2000s.

The Committee for Informatization and Communications of St. Petersburg expressed its gratitude for the development and successful implementation of engineering solutions aimed at ensuring social facilities. PPO-Elektroniikka received the Certificate of Honor on its 35th anniversary.

PPO-Elektroniikka launched the export of Finnish Softex fire -extinguishing systems to Russia in 2003.

– We have provided more than 100 systems. For example, in St. Petersburg, we have built the system for the Alexandrinsky Theatre, Lenta -shopping centers, the Ambassador Hotel and large logistics centers such as Osinovaya Roscha -terminal and Troitskiy Logopark. Cooperation with the Russian authorities has been effective and smooth, says PPO-Elektroniikka's Managing Director Timo Ohtonen. – The economic situation in Russia has been difficult, but the continued cooperation functions very well in spite of that, Ohtonen says with satisfaction. Country Manager Boris Rybalchenko (*pictured*) is taking care of connections in the St. Petersburg office.

The Softex water mist extinguishing system is a low-pressure extinguishing solution with low water consumption that is ideal for property protection. Systems can be installed both in renovation work and for newly-built properties.

PPO-Elektroniikka is 35-year-old designer and manufacturer of professional electronics. We offer high-quality products and solutions - made in Finland.
